We've created the Movement Intelligence Tactic System (MITs), which are "precise, targeted passes that streamline player control and team play". FIFA 22 is the first to feature an all-new FIFA Crib System. In addition to reading and learning the traits of more than 40,000 real-life gamers, you'll be able to create your own player by assembling a team of up to eight players and create your own personalized playbook. In addition, we've created the next-generation Simulant Movement System. This technology allows you to build your own, in-game team, complete with realistic player attributes. In FIFA 22, for the first time, you can also create goalkeepers and you can even control the defensive line of the opposing team. We've also used the FIFA Master Team Builder, where you're able to control all aspects of a football team. All these features are designed to create a more authentic and responsive FIFA experience, and allow you to create and customise a team that suits your playstyle. Finally, the new Social Progression system has been revolutionised to ensure that you're always challenged to improve across a wide range of new and engaging gameplay experiences. So as to find out more about FIFA 22 and see even more of what it has in store, we'd like you to sit back and have a look at the video below. Share your thoughts on this new FIFA feature in the comments below.

Q: c# FileExists exception - external hard drive I have a problem. I use .Net 2.0. I have written a program that checks if a file exists or not. It checks if the file exists in a directory that I've set as a variable. Now the problem I have is when I try to execute this program in an external hard drive, it gives me this exception. System.IO.IOException: The process cannot access the file 'D:\...\Files\...\File.txt' because it is being used by another process. at System.IO.__Error.WinIOError(Int32 errorCode, String maybeFullPath) at System.IO.FileStream.Init(String path, FileMode mode, FileAccess access, Int32 rights, Boolean useRights, FileShare share, Int32 bufferSize, File
