One of the most remarkable things about the ancient art of the armor smith is the universality of the piece: a breastplate or a helmet seems so specific to military man, yet dozens of similar items have been unearthed by archaeologists for thousands of years, across cultures, regions and time. This article explores the development of armor, from stitched leather jackets over millennia to elaborate body armor in the latest century, and how the development of technology has enabled a new sub-discipline of archaeology to study it. The evolution of armor can be seen on a broader scale doc515b9f4

Wine. Christens Thesis Charlie Tourny Editioncad Rivalling even the hallmark time-eater Sony PlayStation3, the new Xbox 360 is Microsoft's first serious push in the living room: combining state-of-the-art technology with Xbox LIVE, with a price tag to match. Well, not the price tag. The thing is, the Xbox 360 will be sold for somewhere in the \$500 to \$800 range by June 2010, making it two-to-three hundred bucks more than your average Sony PlayStation3. And that's for a new console, more or less: I was told that the system will be able to be upgraded with software, too. This is why Apple made so much money off the iPhone, after all. Plus, there will be a lot of video games for Xbox 360, which will be released for free on the Xbox Live, the service that most Xbox 360 owners have already bought into. The first of these games will be Gears of War 2, which will be released in late June or early July. You'll also be able to control your Xbox 360 with the remote and keyboard that comes with it, and if you got a new 802.11n wireless mouse or play with a wired one, the Xbox 360 controllers are also pretty awesome. There are also hardware-based controllers, like the standard wired ones, and non-wired ones, like the \$50 Xbox 360 wireless controller. (The new non-wired ones come with the 360, though.) And you can use other storage options, like external hard drives or SD cards. Last, there's a new thing called the Xbox Live Avatar, an online avatar that will be tied to your account. Upload it to the web and you can access it in 360 games, live chat, and other online services. I wonder if this could cause us to view games as pieces of art, like a 3D logo as opposed to just a piece of text on a screen. Either way, it'll be cool to see. The five p
