You can purchase the premium version with a credit card or paypal directly in the app. Archer Network Monitor is a standalone app (no root needed). How many connected devices are supported? Currently, you can connect up to 15 devices. The user interface is designed to provide the best experience for you.

What's New in the PingStatus?

The program features a friendly user interface which allows you to easily read statistics and customize the program settings. With PingStatus, you can customize the statistical data displayed. So what are you waiting for? Check out PingStatus now! Sometimes, your Internet connection can be slow or it could disconnect you while browsing for no obvious reason. This could be caused by increased ping and high data packets loss. A handy application that could help you monitor your Internet connection and determine if there are any problems caused by high ping or data packets loss is PingStatus. It monitors your Internet connection by registering the ping and the number of packets sent, as well as those lost, thus helping you determine your optimal upload or download limit. In order to properly function, the application requires .Net Framework installed on your computer. Handy Internet connection monitoring tool The program allows you to monitor failures of your Internet connection, so that you know when it is slower or packets are lost when data exchange occurs. This way, you will be able to adjust your upload and download limit to match with the current speed of your Internet connection. Furthermore, you can test the speed of your Internet connection to any website that you want, in order to see which one has a lower ping and packet loss ratio. By doing so, you can choose several of them over others, as they have faster reaction speeds. Reliable network observer with user-friendly interface By using PingStatus, you are able to easily determine if your Internet connection is losing too many packets or maintains a stable data flow. Aside from this, you can customize the statistical data displayed, as the program can be set to display various colors for different values registered for the ping. A lightweight, yet dependable Internet connection monitor To conclude, PingStatus helps you monitor your Internet connection speed, by displaying the number of packets lost during data transaction, as well as the ping registered. PingStatus Description: The program features a friendly user interface which allows you to easily read statistics and customize the program settings. With PingStatus, you can customize the statistical data displayed. So what are you waiting for? Check out PingStatus now! Sometimes, your Internet connection can be slow or it could disconnect you while browsing for no obvious reason. This could be caused by increased ping and high data packets loss. A handy application that could help you monitor your Internet connection and determine if there are any problems caused by high ping or data packets loss is PingStatus. It monitors your Internet connection

System Requirements For PingStatus:

*Windows 7/8/8.1/10 64bit *1GB RAM *500 MB available space *Internet Connection *DirectX 11 *Keyboard/Mouse *Mousepad
*DirectXTools *Warzone 2 does not support Windows 8.0 - 8.1, except as an evaluation copy, or through a retail purchase from Origin, where they may also require a hard drive reformat. It may be possible to run the game using a "side
