App Manager is a simple to use application that helps you to maintain a system registry. The software is a convenient way to search for system registry keys and values. With this application you can easily find values that are specifically associated with a specific program or another application, to help troubleshoot problems or implement improvements. The application is packaged in a self-extracting installation archive, so you don't need to install and configure the registry manually. The application includes a very simple interface that lets you create a new search query, choose a folder to search in, select the registry key or value you want to find, and then click 'Find'. Next, you need to navigate to the registry value you want to modify and change the value or delete the key you want to disable. Then, the software will automatically open the folder where you chose to search for. Finally, select the file you want to install and click 'Install' to install the application to the registry. App Manager is a simple and easy to use application that helps you to maintain a system registry.
