Instructions: Open questions in computer science by ela kumar is a study guide for several computer science courses. You may purchase an individual copy of this product or a series at a. In this product you will find several kinds of questions: Multiple Choice Questions (MCQs) Fill in the Blanks. Exercises/Tests Solutions Short Answers Free pages Essays Whatever your needs and preferences are, you can find the best match with Buy Computer Science by Internet by xyz books ela kumar (ISBN: 0232749759), get it in the best version at the best price.1. Field of the Invention The present invention relates to a contrast-enhancement device that can be used, for example, in a projector in which light is illuminated on the surface of a projection screen. 2. Description of the Related Art As this type of contrast-enhancement device, a contrast-enhancement device utilizing image-forming by a microlens array has been known. In a contrast-enhancement device having an image-forming property utilizing a microlens array, the microlens array is constituted such that a plurality of microlenses each are arranged in a strip-shaped arrangement or in an array-shaped arrangement. The contrast-enhancement device having an image-forming property utilizing a microlens array can obtain a contrast by thinning out the illuminant light, which is incident on the entire surface of a microlens. In the case of the contrast-enhancement device having an image-forming property utilizing a microlens array, when the light illuminant time becomes T, the illuminant light incident on the microlens, which has thinned out the illuminant light, becomes, on the other hand, T/N times that of the original illuminant light, where N is the number of microlenses which are thinned out. Therefore, when the illuminant light illuminates, for example, a projection screen, the amount of reflected light on the projection screen is lessened (as a whole, thinned out), and the contrast of a projected image on the projection screen is improved. A first prior-art example of contrast-enhancement device in which a microlens array is used is disclosed in Japanese Unexamined Patent Publication (KOKAI)
