It is only a matter of where you will place your attention when success or failure is inevitable." - Charles Swindoll Success is not a matter of getting a pat on the back or a party invitation from Oprah, no matter how many hits you get online. I'm not making that up, it's exactly what the original poster said, although he was light-years from the truth. "Success" is a word that conjures up stories, fantasies and grandiose ideas of riches, fame and all sorts of other impossible things. Swindoll is right, but in all honesty, if you think you're just going to jump into some higher-paying, more enjoyable career, that's nonsense. The real key to success is a change in our mindset. Very little. Success is a state of mind. It's knowing that there's no room in your mindset for failure, mediocrity and incrementalism. It's doing what you can do, on a day-to-day basis. Knowing that, whatever happens, you're going to keep moving forward, no matter what. If you've read a lot about success, heard a lot of success stories, and even been part of some very successful people, you know that you can't make an omelet without breaking a few eggs. The other thing is, people who have never had to make it on their own will
