According to the WAM news agency, the Palestinian Authority said yesterday that the plant will be of a capacity of 500 megawatts. Nir Rosen, senior vice president for the water and wastewater infrastructure program at the World Bank, told the news agency

that the project would be part of the PA's efforts to increase electricity generation capacity. "Without the security of a strong supply chain of power generation, our ability to attract private sector investment in the Palestinian government's electricity sector will be limited," Rosen said. "This Power Generation Strategic Plan has the potential to increase electricity generation capacity from 21 percent to above 40 percent by 2015," he added. WAM News agency said that Energy Minister Hani Abu-Hussein claimed that the project, which is being built in

Jericho, will provide enough electricity to
