Daytrip HUB is an application created to help you manage your trips in real time. The interface offers four different views to check your itinerary and details in and out of destinations, as well as record your plans. Other than trips, the application enables you to track other related items, like drivers or deliveries. Advantages Being portable, this application can be carried on different Windows-based devices without affecting the system's stability. Dedicated to managing your trips, the interface features both a very simple and straightforward layout. In addition to trips, the app lets you track your other important activities (drivers, delivery, etc.) in real time. You can set different trip routes, monitor your progress, and control your visits in real time. Conclusion Being effective and easy to navigate, the app Daytrip HUB is a welcome addition to our list of the best calendar programs. Daytrip HUB Description: The stylish interface of the Internet Explorer 8 has been redesigned to offer both a more practical and an aesthetically pleasing appearance. Day-to-day tasks With this release. Microsoft has included a number of great features that enable you to work more efficiently. For example, the search bar on the address bar is now a drop-down menu, letting you easily find the services you are searching for using a specific term. If you are experiencing problems with Internet Explorer 8, the new version includes an enhanced troubleshooter, and the dedicated "Help and Tools" page offers you access to guides on how to navigate on the new platform. Navigation can also be simplified thanks to a new Tabs view, which enables you to go back to an address in just one click. When you go online, you can now see if someone's using your computer via the new Peer Review icon that will appear next to the address bar. In addition, the way to initiate a download using Internet Explorer 8 has been revised to make it easier to retrieve the file you desire. Miscellaneous This version of Internet Explorer 8 also bundles several other useful tools, such as a feature that enables you to save your favorites pages automatically, as well as the ability to save browser settings. Furthermore, the Internet Explorer 8 has been updated to support the enhanced security tools built in Windows Vista, like the Biometric Login. Keep in mind that this version of Internet Explorer 8 is not yet ready for use and will only work with Windows Vista, Windows

#### What's New In DaysEase?

Sometimes you need a handy tool that would help you create and print monthly or yearly calendars. This program is for those who would like to do so without leaving Windows for a few hours, because it's a portable application that doesn't leave any traces in your computer's Registry. It's all about the calendar's layout, the title, fonts, photo position, etc. When you pick a date to display, you can choose the right day number mode: right or left. PlanetsEye is a universal app that allows you to easily navigate your entire galaxy, pick your preferred star system, travel through time and space, and explore hundreds of universal databases and star maps. You are welcome to make the most out of your PC. PlanetsEye Summary: This application is a great solution in case you need to have quick access to information about stars, planets, galaxies, solar systems, and our own solar system, without leaving your Windows computer. PlanetsEye is completely free and has no annoying ads or timers. A simple but yet pretty user-friendly interface enables you to easily navigate the universe. Key features PlanetsEye offers extensive navigation over the entire Milky Way, star, planet, and solar system maps, as well as your own solar system in details. Moreover, you can view thousands of universal databases and explore several eBooks that contain a wealth of astronomical information. The app is compatible with any Windows operating system, and it remains light on system resources. During our tests, we have realized that this tool is fast enough for most computing activities. Bottom line PlanetsEye is a universal app that can be used for finding out the whereabouts of your favorite stars and planets. It's guite user-friendly and offers a simple interface. It's available as freeware and won't leave any traces in your system. Check out our new site Makeup Addiction add your own caption add your own

### **System Requirements For DaysEase:**

Windows PC - 1GHz Processor 2 GB Ram 10 GB HD Space HD Video Card with DirectX 9.0 Internet Connection If you can remember the above mentioned specifications, you should be fine. For the game itself, it should be similar to any other FPS game of its time. The level of graphics should be considered average for the time. However, because the development of games in the early 2000s took place more on the cutting edge, many of these games lag behind these standards, and this is something we are trying to address.
