The **Ashampoo Spectre Meltdown CPU Checker For Windows 10 Crack** is a free security tool that informs you of potential security weaknesses in your computer. It makes it possible to check the vulnerability status of your PC for both Meltdown and Spectre attacks. Your device may be vulnerable to Meltdown or Spectre attacks. Check the security of your computer and make sure it is safe from attack. The **Ashampoo Spectre Meltdown CPU Checker** makes it possible to see the vulnerability status of your PC with no complicated settings to deal with. The security weaknesses are shown in a simple, intuitive interface. Publisher's Description The most important security-related news that reached the headlines at the beginning of 2018 was related to the Spectre and Meltdown security issues that affect Intel processors. Known to affect the overall system's performance, these vulnerabilities might open a new door to cybercriminals into your PC. Security researches discovered that Meltdown has only affected Intel chips and there are already software updates issued by Microsoft to address this issue. On the other hand, certain versions of Spectre affect potentially all CPUs, no matter the platform or device. Infection might occur if you open infected email attachments or access malicious or compromised websites designed to slide malicious code into the computer. Check if your PC is vulnerable to Spectre and Meltdown While the entire community is waiting for the upcoming releases of updated versions of software that can block Spectre and Meltdown, other companies have created tools to help you determine whether your PC is vulnerable or not and get advice on the actions to take. One of them is suggestively named **Ashampoo Spectre Meltdown CPU Checker**. Shows you vulnerabilities in your PC and offers recommendations. Making use of a more complex Microsoft checking method, this lightweight application enables you to see the vulnerability status of your machine at the push of a button, with no complicated settings to deal with. The analysis is quick and the diagnostic is revealed in no time for each of the two attack vectors. If the PC is equipped with an Intel processor, there's a high chance that it is vulnerable to Spectre, if not to Meltdown as well. What's more, the application offers a link to a page containing additional information about these vulnerabilities and ways to prevent potential infections. Get the security status of your PC and read about the preventive measures to take. The security weaknesses discovered in January 2018 reveal elementary issues in the design of modern processors, which are not flawless. Keep in mind that the **Ashampoo Spectre Meltdown CPU**
