The depth of data used for the game was key to its success. The aim was to make the mechanics of a real football match accessible to players through real-life gameplay. “One of the biggest challenges we faced was to do more with less,” explained Mark Cooper, FIFA Global Lead on FIFA 22, “The amount of data we needed to do our job was huge, and a lot of time had to be invested in simulating the data – but this was so important to us that we became obsessive about collecting the data we needed.”

Underlying the gameplay is the new physics system, which not only provides more realistic scenarios for players, but also makes the game more dynamic. “There’s so much more happening when you touch a ball now,” said Jason Kreis. “Each football match continues to build towards an explosive conclusion, and players react to tackles with a new level of finesse.” He continued, “Dynamic player flight creates a real sense of a match, keeping the momentum of a game alive. It has a huge, positive impact on the overall feel of the game.” “We wanted to make sure that each aspect of our gameplay lived up to the standard set by the last game,” said Michel Platini. “We worked with Mark on the new physics engine and made sure that it was developed to the highest quality. He didn’t take ‘no’ for an answer, and pushed us to push ourselves.” “In my opinion, FIFA on the PS4 is the best in terms of graphics and gameplay, but the gameplay of FIFA 20 was a little better,” said MARCO MATTIL, FIFA 20’s Lead Campaign Designer. “So that I can say it is as if FIFA 20 was not released.” “Exclusive Features” A look at the game’s exclusive features is also on our agenda. FIFA Ultimate Team (FUT) is back, and it gives players the chance to team up with their favourite players and build a fantasy squad from over 700 real-life and more than 200 playable football stars. “FUT” provides the opportunity to build and manage a completely new life-like FIFA Ultimate Team and connect with players that are not available in the game.
