The Pitch 2 Modular VST has just received a big upgrade. The new release of the mod adds 32 new columns and more than 2000 new

---

waveforms from the WTF Audio library, and it also includes a set of new instruments and effects. R2D2 is a free VST and AU plugin for a lot of different platforms. It provides electronic sounds similar to a Cylon from Star Wars. But this is not only a Star Wars plugin. The Arp & FX that comes with it are based on music from movies from the 90's and it has retro synth sounds. He's Bestie is a plugin that let you connect to the internet and download new sounds from the internet every time he plays or loops a sound. A strong pixel character with the shape of the classic robot from Star Wars. I built him up from the ground up and I think he's been a good fit for the music that I've been making. He's Bestie will appear in the next "Orange" version of The Pitch, as well as as part of The One of the themes from The Wreck of The Titan is playable as a custom track in this Pitch Modular patch. This was only possible due to the permission of Fr0z3R from WTF Audio. P d0c515b9f4
