Adobe Lightroom is a digital photography workflow and organization tool. It does not contain photo editing features but it is still very popular and used for almost every digital photo. Adobe Photoshop is a professional photo editing software. It is the most popular software worldwide. It has various formats for every type of image and professional editing tools which are very useful for the majority of images taken on a daily basis. Adobe Illustrator is a vector graphics editor created by Adobe. It can create and manipulate vectors, which makes it an indispensable tool for any design process. I do not know any companies which are offering free photoshop plug-ins but it's possible to use a couple of them with some time (e.g. Filterstorm or SnapzPro to automate the stitching process, or WarpStitch to create a panoramic image). A complete Photoshop package from Adobe is a very cost-effective way to have great images. Photoshop may vary between \$30 - \$400 depending on whether you want the version with the complete professional environment or a cheaper version with less features. Photoshop Elements is a good starting point but if you want more features you can upgrade to Photoshop or use the free trial version of Photoshop for 30 days. Lightroom is a high-end photo workflow and organization tool which allows you to manage everything related to your photo library (e.g. cataloging, printing, sharing and more). Adobe Photoshop is the most popular software for photo editing, but Photoshop isn't suitable for beginners. RAW vs. JPEG and JPG is a common question and my best answer is to always select the RAW format. RAW format is a RAW file with more quality than a JPG/JPEG format. RAW format can be processed as a JPG/JPEG format afterwards, but some of the best features that are applied when processing the RAW file will not be applied to the JPG/JPEG version. RAW is the most "straightforward" format. It means you don't have to make any adjustments or preferences and the images are already ready. The only downside of the RAW format is that it takes up the most space and time to process. * **The Lasso Tool** allows you to either select an object by clicking its desired border or to draw a freeform selection around objects or other areas. * **The Pen Tool** helps you to draw simple vector shapes that are precise when you draw them, but are easily edited (e.g., to change their color, size, or shape). * **The Pencil Tool** lets you draw with a digital "lead" of various colors and widths. You can use the Pencil Tool to draw with graphite, dry ink, indelible, or colored pencils. New in Photoshop CS5: The Control+T keyboard shortcut (Windows) or shortcut menu (Mac) enables you to quickly "paint" in the image just as though you were using a Brush. You can edit your images in two ways. You can do it on your computer (as described on the next page), or you can transfer the image to a preview disk or website (as explained in the next sections). ## Updating Your Photos Online Adobe ImageReady and Lightroom are powerful desktop image-editing programs, but they aren't fully integrated with the web. The new, fully web-optimized version of Photoshop, Photoshop Elements, does a much better job, so if you want the most up-to-date version of Photoshop (PSD or PSB file format), you'll want to use the program's web-based edition. Photoshop Elements gives you everything you need to upload, optimize, and publish photos from your computer. You can also use it to edit and rearrange photos on your web site.

The LA Galaxy and the Colorado Rapids were both trying to win their respective game, but they are both suffering the consequences. Colorado were inspired by a last-minute own goal from Galaxy goalkeeper Brian Rowe to come from behind to beat LA 2-1 in a game that was tightly-contested, but also ended up one of the most exciting in MLS this season. "This is an exciting time of the year and to come out of Colorado and get a point is really good, especially at home," said LA head coach Sigi Schmid. It was the first time Rowe suffered a home defeat in MLS after 11 games and the Galaxy have an indifferent start to the season with only one win in four games. But LA have now lost in three straight home games - two to Atlanta and the Rapids - and the forwards' inability to break through the Colorado defense has been critical. "We're in a moment now where we're really in a position of trying to establish our standards and our rhythm," Schmid said. ♦
