Seara's Ownd.Q: Is it possible to create a view that can be queried by two different keys? I'm trying  
to create a view that can be queried by both a user ID and a course ID. To do so I've created the  
following view: CREATE OR REPLACE FORCE VIEW quiz\_user\_courses AS SELECT \* FROM users  
WHERE id IN ( SELECT user\_id FROM courses WHERE course\_id = :P\_COURSE\_ID ) OR id IN ( SELECT  
course\_id FROM users WHERE user\_id = :P\_USER\_ID ) ; The problem with this is that neither the user  
ID nor the course ID is ever unique in the table. Is it possible to create such a view in Postgres? A:  
You can use a CTE, and join it back to the tables: WITH q AS ( SELECT a.user\_id, b.course\_id FROM  
users a LEFT JOIN courses b ON a.user\_id = b.user\_id AND b.course\_id = :P\_COURSE\_ID ) SELECT a.\*  
FROM users a LEFT JOIN q b ON a.user\_id = b.user\_id AND b.course\_id = :P\_USER\_
