In FIFA 20, the new “Emotional Intelligence” system was introduced, which is designed to make sure players are a step ahead of the opposition. “Emotional Intelligence” was the key addition to the game, allowing players to use their psychology and emotions to score, with the game’s best players now specialised into specific roles, meaning they excel in specific areas of the game, such as passing, dribbling, shooting or marking. In this preview, we have a closer look at the major features of FIFA 22, including “Emotional Intelligence,” “Player Positioning,” “Run,” “Skills Challenge,” “Dynamic Tactics” and “Experience Mode”, as well as breaking down the new tutorials and the “Pass-Combination” system. What is FIFA 22? FIFA 22 is the biggest release of the series since FIFA 14. Announced at EA’s E3 presentation, it is a huge year of improvements for FIFA on consoles, PC and, for the first time, next-gen consoles. FIFA 22 introduces “HyperMotion Technology,” which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay. Let’s take a look at the new features of FIFA 22, as detailed in FIFA 20 guide. Emotional Intelligence Emotional Intelligence: That feeling of being able to predict the opposition’s next move is a fundamental part of playing FIFA, and “Emotional Intelligence” is the key addition to the game. It’s a system that is designed to make sure players are a step ahead of the opposition, capable of influencing the game through their psychology and emotions. For example, the “Behavior Analysis” system analyses the player’s reactions to different situations and events, such as an opponent attempting to dribble past him. It can then make a prediction as to whether a player will change his positioning, or take an early run-up and shoot in an attempt to score a goal. For a full breakdown of the “Emotional Intelligence” system, check out FIFA 20 guide

Ultimate Team takes on the role of an unconventional FIFA manager. By connecting with your favourite players and clubs, you'll choose your FUT squad and create a custom team - all on the go. Bring the team together at matches to help them build chemistry and perform in-game to help you achieve countless goals. Be a Manager - Create your own team using the Manager cards you earn from gameplay. Then play the cards in your manager's card collection to score valuable cards. FIFA Ultimate Team Championship - Take on other FIFA Ultimate Team managers in this new season and league format, where you'll compete to become the ultimate FIFA manager. To lead your team to glory, you'll need to use cards you earn from gameplay and the many tournaments held throughout the year. Real Madrid - Real Madrid is the biggest club in the world, and you can join them on the pitch with FIFA 22. With your custom avatar, you'll step onto the field and lead them to glory as you guide them through the Italian Serie A, English Premier League, La Liga, UEFA Champions League and UEFA Super Cup in football's most authentic competitions. Las Palmas - Las Palmas is a small island in the Canary Islands, not far from Tenerife. It is home to a multi-faceted club that is just beginning to challenge for the top of the Spanish Primera Division, the highest level of the Spanish league system. Granada - Situated at the foot of the Sierra Nevada mountain range, Granada is one of Spain's most picturesque cities and is known for its Moorish architecture. For this unique and beautiful city, El Chiringuito de Jugones has created a new team of their own. Bordeaux - In the heart of France, Bordeaux is one of the historic, cultural and economic centres of the country. As a fan of a club known for its rapid ascent and history of progressive development, you'll be glad that you can now play in the French Ligue 1, the highest level of the French league system. Toulouse - Founded in 1910, Toulouse was one of the earliest clubs to support the French football league system, and it is the most successful club in the Midi-Pyrénées region. In this region, football has long been the most popular sport, and Toulouse has long been one of the region

What's new in Fifa 22:

- **FIFA 22 is out now - Only in the UK on PS4. FIFA 15 sold more than any other soccer game in British history until the release of FIFA 22.**
- **Into the New Era - The biggest rule change in years. Crucially impactful changes include Defensive Defending Pressure Points (DDPP) coming into the game, the implementation of Club Protection Zone and all these changes resulting in a more interesting match and cleaner goal box.**
- **Fan Shout-Outs - Fans will now have the opportunity to offer more than simply simple praise or criticism of their players. You can now thank or criticise players on the pitch by encouraging them to perform better or retire them from action with one simple fan shout-out.**
- **Intelligence-based Player Behaviour - First-time in FIFA's history, your players must adapt to their environment or be punished by multiple opponents. Scoring, passing, dribbling and pace are now becoming more intelligent thanks to this new optional system.**
- **[Only in vita] Improved Broadcasts - Sky Sports and NBC Sports have signed on from the pitch to the biggest domestic leagues to get more match replays, lineups and dynamic camera angles which, added to the depth and importance of match day, create the best covered action in the business. You can turn this enhancement on or off in the match settings**

In FIFA, you and your teammates are the ultimate mix of speed and power. For the first time ever, the classic foot-to-ball controls have been rebuilt to be faster, tighter and more responsive. Footwork and its associated skills like first touches and defensive reactions are no longer just a forgotten part of the game, they are now at the heart of each move you make. The speed and responsiveness of control is enhanced by visual cues and animations like "Jump" and "Match Control." The "Jump" animation shows the moment when your player's weight transfers to his left foot and into the next step. The "Match Control" animation shows you adjusting your ball position before the next pass, quickly checking if you have support and guiding the ball when you're running without support. Players react more naturally to the ball and build pressure from a deeper level, making them more aware of their positioning. The revamped control system introduces a new combo pass button that lets you send a second pass through your defender by pressing and holding the button. To make things easier for your teammates, you can execute the offside trap without breaking your stance. After releasing the pass, you can adjust your body and slot the ball away for a goal. It's a simple and powerful new way to use the tools available. EA SPORTS Football Engine The engine powering FIFA 22 and the biggest step in FIFA's evolution, the EA SPORTS Football Engine, has been rebuilt from the ground up to give players the most authentic simulation of football on any platform. The engine enables you to experience the speed, power, and unpredictability of real-world football like never before. Some of the key features of the engine are: A new physics system that factors in player weight, stamina, and pace, allowing you to better control the position of the ball on the pitch A new animation set that combines the best aspects of real player animation with real-world game data Improved ball movement and behavior that take into account the characteristics of the pitches used in real competitions Authentic and variable pitch surfaces at all 12 FIFA World Cup™ stadiums The ability to replicate the ball's behavior and movement with more accuracy at higher speeds Graphics upgrades for players, stadiums, crowds, flags, and jerseys A more aggressive defensive AI that anticipates play and switches between offence and defence based on the situation Improved coverage and pass completion AI New
