Eight teams from the Confederation will then be selected from the eight licensed professional clubs - Milan, Atletico Madrid, Real Madrid, Liverpool, Milan, Marseille, Borussia Dortmund and Villarreal - to compete in this year's UEFA European Club Cup. They will be joined by Czech side Slavia Praha who are seeking UEFA Champions League football for the first time since 1990. The competition will pit the teams against European opposition in a series of single games. The final will be played in one of the top three countries in Europe. Across these competitions, FIFA Mobile will remain unchanged - more announcements will be made before the start of FIFA Mobile's FIFA Interactive World Cup in September. FIFA 22 for mobile is now available on Google Play and App Store, and is free-to-play with in-app purchases available on Google Play and Apple Store. FIFA Mobile is currently available in more than 150 countries in all regions worldwide and is expected to be a multi-million dollar business for EA in the coming year. The new game mode, The Journey, returns with a roster of over 60 unique players and more than 50 legendary players. The legendary players include the likes of Ronaldo, Fabio Cannavaro, Zinedine Zidane and Emile Heskey. Choose from over 900 kits and more than 100 football clubs. The game mode can be played in two ways: offline and online, and also includes a Touch Motion feature which allows for ease of gameplay when you're on the go and without a connected internet connection. Players will also be equipped with improved Player Ratings which are now calculated based on the ratings of the current season. This will make it easier to swap players within the same team. The game also includes the automatic Photo Background feature, which will generate backgrounds based on the current club you are playing for. This creates a dynamic environment that reflects the club and the team you are currently playing for. Free Items also return and players can use them to unlock incredible player attributes. This includes new special signing kits, premium player attributes, BTS animations, player and team stickers and more. Next month, FIFA Mobile will get a brand new update which introduces the new Visual Pass feature, which is a visual pass meter which shows where the ball is going to go, enabling you to make more accurate passes in real time. The new update will also allow players to re-sync after a game has finished.
