Brand Manager for FIFA and the FIFA franchise Patrick Granzier-Isherwood says, "We got used to winning by fighting with other top players in the past - we now want you to fight, follow and execute on-ball actions. Fans will see more open dribbling and one-on-one dribbling challenges - they will feel a new sense of speed. The all-new system gives more control and choice to the player in the way they interact with the ball, in the way they want to move the ball, and how they want to play on the opposition's ball. This will make all of your on-ball actions different from other players - a hyper-awareness of ball, opposition and space." FIFA 22 is set in three distinct eras. Starting from the year 2002 where refereeing changes, the game will progress to the 2016 season where strategy and tactical play are the order of the day. FIFA 22: Build-Up FIFA 18 was released last year, and since then, fans have been anxious to see how EA Sports have improved FIFA's gameplay. In addition to FIFA Interactive, FIFA in-game editors, FIFA Ultimate Team and FIFA Mobile, EA Sports has spent a considerable amount of time and effort in polishing FIFA's gameplay. Today we find out how the game will look and feel like. FIFA: The Journey The Journey is a 2.5D adventure game, and the official game name is FIFA.
