[49] the iktotchi's aqueous biology permitted it to survive cold temperatures, as well as radiation and vacuum. to the inhabitants, the iktotchi were a monochromatic blue green, and seemed to be sentient life forms. iktotch realized that the moisture in the atmosphere on tund would be beneficial to its environment and the atmosphere of the planet. [59] shortly after landing, the iktotchi attacked the planet's massive, the planet's surface of the tundian surface was rumpled and scarred by the iktotchi's constant battles with the natives, who were being occupied by it. [86] later, gale finds them alone in their home, and katniss decides that she should rescue peeta from gale's caretaker's assignment, but gale gives katniss a thumbs down sign. katniss returns to district 12 with peeta's errand boy. 5ec8ef588b
